Education

California State Polytechnic University, Pomona — Pomona, CA
B.S. Computer Science, Minor in Data Science - GPA: 3.40 — Sep 2020 - Apr 2025

Professional Experience

IT Infrastructure Technician — Glendale, CA
DOV Group — Sep 2025 - Present

- Provide remote and onsite technical support across multiple client environments, resolving workstation, network, software, hardware, user-access, and Microsoft Entra ID issues
- Independently manage day-to-day IT operations for client offices while coordinating with internal IT teams and company leadership on troubleshooting, deployments, and technical needs
- Manage hardware deployment, asset lifecycle tracking, and business technology infrastructure including workstations, conferencing systems, security cameras, and other network-connected devices

IT Support Intern & Instructor — Pomona, CA
Lavner Education — Jun 2025 - Aug 2025

- Configured and maintained computer hardware, classroom systems, and network infrastructure to support daily program operations
- Diagnosed and resolved real-time technical issues for instructors and students, minimizing downtime and ensuring consistent system performance
- Coordinated with central IT teams to troubleshoot and resolve site-level technical issues, improving communication and implementation efficiency

Lead ML Engineer — Pomona, CA
Cal Poly Pomona Enterprises — Undergraduate Research — Apr 2024 - Jun 2026

- Developed and trained neural networks for aerospace structural-health-monitoring applications, using strain-gauge data to localize structural damage and predict full-field stress behavior in a digital-twin framework
- Engineered deep-learning models on 19+ million finite-element data points generated across 480 ANSYS simulations, achieving R^2 values of 0.99 for high-resolution von Mises stress prediction across varying damage locations and loading conditions
- Integrated trained neural-network models into an interactive aerospace digital-twin web application, using ONNX for real-time browser-based damage localization and stress-field prediction and visualization

Freelance Web Developer — Duarte, CA
Self-Employed - www.dylanmonge.dev — May 2025 - Present

- Deploy and maintain production web environments using Vercel, Supabase/PostgreSQL, and third-party platforms, configuring DNS, SSL, hosting, authentication, and database integrations
- Partner directly with clients to translate business requirements into reliable technical solutions, integrating payment, scheduling, inventory, and other operational systems
- Collaborate with clients throughout the design process to define visual direction, refine layouts and user experience, and deliver polished interfaces aligned with brand identity and business goals

Technical Skills

Systems & Identity: Windows 10/11, Microsoft Entra ID, Microsoft 365, Active Directory, Remote Desktop
Networking: TCP/IP, DNS, DHCP, VLANs, LAN/Wi-Fi Troubleshooting, Network-Connected Devices
Cloud & Infrastructure: AWS, Vercel, Firebase, Supabase, DNS/SSL, GitHub Pages, Linux
Scripting & Development: PowerShell, Python, JavaScript/TypeScript, SQL, Git
Certification: AWS Certified Cloud Practitioner
